Willow Creek Coal Said to be Good For Briquetting

Mr. Chas. Knight of Calgary, research chemist who has patented the Knight process of "bricketting" coal, has made extensive laboratory tests of Willow Creek coal, to determine its suitability for use by the Knight Briquetting Process, and has pronounced the coal extremely satisfactory for this method of handling. The Knight Briquetting Process is a method of changing ordinary lignite coal into a high grade fuel, which will not deteriorate for a long time, even if the coal is piled out in the open. It will stand any amount of handling or ship any distance as the coal becomes hard as granite after it has gone through the process. It is absolutely clean and can be dumped on a concrete basement floor, without making any dust in the house, and a person could handle it with white gloves on without soiling them. It burns with a clear white flame, making no soot and very little smoke and gives out an intense heat, which is very even, there being not much difference in the amount given off from a furnace during the time required to consume the coal (which will take about twenty-four hours for an ordinary furnace full) as the moisture has been removed from the coal it does not require a great deal of draft to burn.

The process consists of taking lignite coal and crushing it to a powder running it over a plate heated to a temperature of about 180 degrees Fahrenheit. This removes the moisture. The coal is

then carried through a retort on endless steel belts, and subjected to a temperature of approximately 409 degrees. This starts the tar and phenols in the coal to melt, bringing the entire body of coal to a sticky or plastic state and removing the heavier volatile gases which produce smoke, leaving only the fixed carbon and lighter volatile gases which cause combustion. It is then forced through a press where a dye subjects it to a pressure of about 50 tons to the square inch. This forces the coal out in the form of bricks as hard as the hardest granite. This process will undoubtedly solve the problem of supplying Ontario with Alberta coal, as it can be laid down in Ontario existing freight rates for considerably less money anthracite coal can be brought in from the American side and in addition it has about 25 per cent more heat value than the best natural anthracite. Mr. Knight states that a plant capable of handling a thousand tons a day could be erected for about \$100,000. It is a well known fact that the Dominion Government is doing every thing in its power to solve the Ontario fuel situation, and make it possible to keep within the Dominion the millions of dollars which is sent annually from Ontario into the United States for coal. Having this fact in view. The Willow Creek Holding Company, Limited, are bringing the details of the Knight process before the proper officials with a view to having the Government assist in the financing of a plant at Willow Creek, using the Knight process, as there is enough high grade coal available in this district to supply the whole Dominion of Canada for many years.

Public Meeting Tomorrow Night

A meeting of the citizens of Chinook at S. H. Smith's shop is announced for Friday, April 26th.

The question to be decided is the date for Chinook Sports Day.

Local Baseball Club Appoints Officers

A meeting of the Chinook Baseball club was held at S. H. Smith's harness shop, Apr. 22nd, The following officers were elected for the season.

Hon. Pres. W. S. Lee
Pres. S. H. Smith.
Vice. Pres. Jas. Rennie.
Sec. Treas. O. Nelson.
Manager. R. Vanhook.

Tennis Club Holds Meeting

First meeting of the Chinook Tennis Club for 1929 was held in Hurley's Store on April 15th, The officers elected for the coming year were,

President—W. A. Hurley
Vice-President—E. E. Jacques
Sec-Treas.—Miss M. J. Bayley

Finance Committee
Messrs S. H. Smith, L. Jones and R. Morrison

Grounds Committee
Messrs S. H. Smith, L. Jones and C. Bennett

Entertaining Committee
Messrs R. Morrison, W. Korek, E. E. Jacques, Mrs. Hurley, Miss M. Todd and Miss M. Bayley.

Sports Committee
Messrs E. Jacques, R. Morrison and W. Korek.

Fees for 1929
Gentlemen's fee \$3.00
Ladies \$2.00

Juniors (those attending school \$1.00

Rules for Club
1—Those playing tennis must wear the regulation Tennis Shoes

2—Juniors not permitted to play after six o'clock.

3—Fees be paid in advance

Delegates Discuss Hospital Question

A meeting of representatives of the proposed Municipal Hospital district of Youngstown, Concord, Veteran, Naco, held at Hemaruka on Tuesday Apr. 23rd to discuss the boundaries and Area of the different districts, Messrs Rideout, Aitken, and Warren attended from Chinook. After discussing the problem of an auxiliary hospital for Chinook, it was decided that if range 6 and 5 on the east side of the district could be included in the Youngstown district it would give the necessary revenue to support a sub-hospital at Chinook. Another difficulty is that Noco has asked that sufficient territory be reserved on the north side of the district to form a district when conditions warranted it. This boundary will be only six miles north of Chinook. If this is done it will considerably decrease the Youngstown area. It is regrettable that this situation has arisen. Every small town cannot have a hospital. They should be placed in the most central part of the district where they can give the greatest service to the majority of residents and then the cost should be considered so that the district's taxes are not excessive.

LADIES' CARD CLUB

The Card Club met at the home of Mrs. I. W. Deman last Tuesday evening, the prize winner being Mrs. Vanhook. The prize was a pretty bon-bon dish.

The Card Club will not meet until further notice.

The Cereal Hotel was totally destroyed by fire last Monday night.

There will be no picture show on Friday or Saturday of this week.

Mr. Munford returned to Chinook this week.

Play commenced this week on the local tennis courts.

The land is in ideal condition for seeding, and the farmers are taking advantage of it.

The school was closed on Wednesday and will be thoroughly fumigated this week and will open on Monday.

The tea which was put on by the C.G.I.T. last Saturday was a great success. The girls had decorated the church beautifully. They realized \$40.00.

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

Canada's Opportunity and Responsibility

It has been said times without number that Canada occupies a paramount and responsible position as interpreter of Great Britain to the United States, and of the United States to Great Britain. Such views have been expressed, not so frequently by Canadians themselves as by leading men in Great Britain and the United States.

Within the past few years the opinion has been expressed by leading citizens of the Empire and of China, Japan, and other oriental lands, that Canada, because of its geographical position and its rapidly expanding trade across the Pacific, likewise occupies a strong position as interpreter of the Orient to the rest of the Empire. Canada is popular in China and Japan as compared with the United States and European countries.

In the councils of the League of Nations this Dominion also stands high, and deservedly so. It is recognized by other countries, and more particularly the smaller nations, that Canada has no selfish purpose to serve through its membership in the League; that, on the contrary, the Canadian attitude is one of disinterestedness, based wholly in a desire to render service to mankind. The Canadian position in the League has always been for peace, conciliation, recognition of the rights of others, and, especially, not merely fair treatment but open generosity and sympathy for minorities.

Because of this unselfish attitude, Canadians are welcome in all lands, and the high opinion entertained for this country is proving a real asset to the business and commercial interests of the Dominion in the opening and development of foreign markets for Canadian products.

Now, one of the most influential men in India, Sir Rabindranath Tagore, the world renowned poet, outlines to Canada a duty which rests upon this young Dominion, not only to itself, or to a group of nations, but to the world. Sir Rabindranath was a distinguished guest and speaker at the recent Conference of the National Council of Education held at Vancouver, and in his farewell message to Canada he gave expression to views which Canadians everywhere may well read, ponder over, and to which they should give heed.

"Canada," he said, "is too young to fall a victim to the malady of disillusionment and scepticism, and she must believe in the great ideals in the face of contradiction—for she has the great gift of youth; she has the direct consciousness of the stir of growth within her which should make her trust herself, which is the only sure way of trusting the world."

How true this last sentence! A man of action which does not trust himself or itself, but lives in an atmosphere of fear and suspicion, can never trust others.

Continuing, this great Indian saint said: "Let Canada feel the sacred dawn of her life, that the expectation of human destiny is upon her as upon other sister countries which have just entered into the cycle of their promise. Canada will have to solve for the salvation of man the most difficult of all problems, the race problem, which has become insistent with the close contact of communities that had their isolation for centuries in their geographical and cultural exclusiveness. Canada will have to reconcile the efficiency of the machine with the creative genius of man, which must build its paradise of self-expression, reconcile science with religion, individual right with the social obligation that it must acknowledge. She must dream of the introduction of honesty even in politics, which is the self-interest of the nation, knowing that such interest can only have its sure foundation in international friendships. She must ever hope to be able to win the heart of the world by offering the best that she produces."

Although his actual knowledge of this country was limited, Sir Rabindranath said Canada possessed powers of character and material resources that would enable her to carve out a destiny free from "the fatigue that old civilizations suffer from the weariness of cynicism."

This is an inspiring vision of Canada's place in the world. It is one that calls for the best that every citizen, regardless of his race or creed, can contribute. And it is because the Canadian people of tomorrow will be a development of the cosmopolitan population of today that the Canada of the future will find within itself the ability, the sympathy, the international viewpoint, which will make possible such a great contribution to the future of mankind and the ultimate and lasting peace of the world, for, until the race problem is solved there can be no peace in any country, or in the world at large.

Sleepers in Buses

Line Between Buffalo and Cleveland Has Comfortable Berths

A bus with sleeping accommodations was exhibited in New York recently. It has gone into service between Buffalo and Cleveland, according to the Great Lakes Stage Line, which operates between those cities and Philadelphia and New York. The bus will accommodate eighteen persons in six double and six single berths, all with outside ventilators. An electric ventilating system changes the air every five minutes.

From Youth to Age

There are three trying periods in a woman's life: when the girl matures to womanhood, when a woman gives birth to her first child, when a woman reaches middle age. At these times Lydia E. Pinkham's Vegetable Compound helps to restore normal health and vigor.

2746, 2747, 2748, 2749, 2750, 2751, 2752, 275

Dirigible Air Ships To Be Given Further Tests To Vindicate Their Worth

Germany and Great Britain preserved their faith in the future of the dirigible airship after a series of untoward accidents to lighter-than-air machines had largely discouraged their value in the opinion of other experts. The recent flight of the Graf Zeppelin from Friedrichshafen, Germany, to the Holy Land and its safe return, however, will go far to vindicate the decision to give the dirigible further tests before placing it in the discard, and interest will be correspondingly heightened in the maiden voyage of the new British craft that is expected to cross the Atlantic to Canada later in the year. But much more remains to be done before the dirigible can be accepted as a permanent factor in aerial transportation.

The Graf Zeppelin returned to her base, completing a voyage of 5,000 miles and of three and a half days duration, the exact time having been 81 hours and 31 minutes. This was the second long cruise of the giant dirigible and in mileage exceeded that of either the trip to the United States or the return trip of last year. En route outward bound the dirigible passed over Lyons and Marseille, France; Corsica, Rome, Messina, Corfu, Crete, Cyprus, Haifa, Jerusalem, Crete and Athens, then back along the Adriatic Sea by way of Hungary to Vienna, Ulm and Friedrichshafen.

As on its Atlantic trip last year, the dirigible encountered rough weather shortly after it started eastward. On the first night, out high winds made cruising as dangerous. Dr. Eckener, its navigator, explained, as it was off Newfoundland, on the return trip to Germany last year. Perhaps the most striking paradox of these modern times came with the arrival of the Zeppelin over the Holy Land, where means of transportation are still mainly what they were thousands of years ago—camels and donkeys. The airship was first sighted off the Mediterranean coast south of Jaffa in the afternoon of Tuesday, March 26, the large German colony, located at the foot of Mount Carmel, giving it a particularly warm reception. Spectacularly, however, the most impressive spectacle witnessed by the passengers in Palestine, came when flying over Tel Aviv, on the day of rejoicing commemorating the Biblical story of Queen Esther. Throngs of visitors from all parts of Palestine had gathered to participate in this year's extraordinary celebration, featured by caravans, masquerades, balls and street parades. The great dirigible descended to a height sufficiently low to enable the gay, cheering throngs, most of them picturesquely costumed, to read easily the airship's name. At different places in Tel Aviv small bugs were dropped containing mail. Jerusalem, where many of the Zeppelin's twenty-seven passengers expected to receive the deepest thrill of the cruise, was reached in the dusk of the evening, so that little of it could be seen, though the ship circled the Holy City for a full hour. Press despatches told of turbulent Moslem sheikhs gazing from centuries-old roof tops and crying "Allah, may thy name be praised; how great are thy wonders!" On its way homeward, favored by auspicious weather, the dirigible averaged about sixty-two miles an hour.

"You said you want me to give your friend literary work? Is he an optimist or a pessimist?"

"What difference does that make?"

"It makes a lot of difference. I want him to edit a seed catalogue."

Uncle: "I suppose you two are putting something by for a rainy day?"

Young wife (brightly): "Oh, rascal. We're saving up hard for a cloth in car."

"The Mean Husband: 'If you lost me, you would have to beg for money.'"

Harrassed Wife: "Well, it would come fairly natural."

Custom: I want a pair of silk stockings for my wife.

Salesgirl: Sheer?

Customer: My good girl, if she was here I'd let her buy them herself.

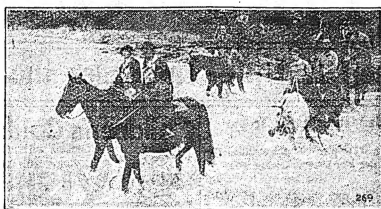

He: 'I've never seen such dreamy eyes.'

She: 'You've never stayed so late before!'

"You are an absolute nuisance with your everlasting washing. If this goes on I shall have to buy a second shirt."—Ulk, Berlin.

Riders on New Trail

Trail Riders at the Glacier Ford.

While most of its members are trying hard to qualify for the 500 mile button it is a remarkable fact that more members of the Trail Riders of the Canadian Rockies have ridden upwards of 2,500 miles of trail than have qualified only for the thousand mile badge. That there are now over a thousand members endeavoring to improve their mileage standing also demonstrates the success the organization has attained during its few short seasons of existence.

The Annual Official Trail Ride and Fow-wow is each year attracting new riders and a wider interest. This year's ride, lasting four days, is fixed to start on August 1st.

The plans are that the start should be from Banff and the ride continue up Healy Creek and Sunshine Valley to Simpson Pass, where the first camp would be pitched. The second camp would be on the shores of Shadow Lake under Mount Ball. This would allow of a side trip partly by pony and partly on foot to the marvellously beautiful Egypt Lakes. Mr. A. O. Wheeler, veteran Alpinist,

who has surveyed this territory, is of the opinion that it includes some of the most wonderful mountain scenery in the Canadian Rockies, but except for Alpine climbers and an occasional hunter this area is practically virgin territory.

Shadow Lake has excellent camping ground, and the Canadian Pacific is building a rest house, as the proposed trail will undoubtedly attract many riders after the Trail Riders have gone over it. The last day's ride will be over another ridge, ending up at Castle Mountain Bungalow Camp on the Banff-Windermere Highway about noon. Here the Fow-wow will be held. There is a miniature golf course at this Bungalow Camp, said to be the highest in the British Empire.

A few days after this four-day ride, a more ambitious long distance ride to last about 17 days is being planned for the Columbia Icefields from Lake Louise. This will be limited to twenty riders exclusive of guides, and those who participate must hold at least the 100-mile (silver) button of the Order.

Honey Production In West

Honey production last year in the three Prairie Provinces—Manitoba, Saskatchewan and Alberta—had a total value of \$1,011,030, of which Manitoba accounted for \$388,130; Saskatchewan, \$77,660, and Alberta, \$56,230.

Music Teacher: "What is an 'opus'?"

Pupil: "It's what you holler when you call the cat!"

It Happened In Turkey

The recent census in Turkey, taken by order of Kemal Pasha, has brought about an amusing episode. Through some mistake the census takers had put down the name of a camel, Haroun Kaba, who was summoned for jury duty. He was brought to the court house by his owners.

The ancient sport of Japan, fencing, is still taught to the children. It is part of their regular school work.

Many Strange Articles Lost

Birmingham, England, Has Queer Assortment While Are Unclaimed

Who is the Birmingham man who left his bed in the street and forgot to come back for it? For several months the bed, complete with mattress, has held a top place in a vast store of articles of every description which have stood as memorials of the forgetfulness of Mr. and Mrs. Birmingham.

Doctors, apparently, are as bad as the rest, for three stethoscopes had their place at the police jumble sale of street finds. Here are some of the other "lots":—

600 umbrellas and walking sticks.

100 ladies' handbags.

88 pairs of eyeglasses.

Six bottles of beer, complete with opener.

False teeth.

Two blood-stained daggers and a sword.

A sample box of "sundries" into which the police had collected a hundred and one oddments, knocked down for a shilling, or so, contained a pound of tea, a packet of biscuits, a score of wireless parts and a syringe.

Improvement In National Parks

Over 400 Miles Of Highways Have Been Built For Comfort Of Visitors

In Canada's 11,000 square miles of national parks steady progress is being made in opening up new outstanding points of scenic beauty to motorist and tourist. Engineering and construction work carried out during 1928 by the National Parks Branch of the Canadian Government Department of the Interior greatly increased the facilities for the comfort and enjoyment of visitors, and preparations for the coming season's tourist flow are now well advanced. The motor roads in the national playgrounds in the Western Provinces were extended during last year and considerable maintenance and improvement work carried out so that there are now over 400 miles of first class highways in the parks. In addition the mileage of tote or secondary roads has been increased, and new riding trails have been laid out and completed.

An Age Of Speed

People Have No Time These Days To Take Things Easy

Nowadays nobody waits — everybody runs. If a man owns a car he finds difficulty in keeping within the speed limit. If he is held up by a red light, he waits impatiently for the change, and then breaks at the flash like a sprinter at the crack of the gun; if he has no automobile he runs for a street car and piles into the first crowded one regardless of the fact that there may be an empty one just behind. Everybody seems to be going somewhere in deadly fear that somebody else will get there ahead of him. What is needed is statistics as to what is done in time saved by all this speed. And it is a good guess that nine out of ten of the speedsters simply save five minutes in order to tack it on to half an hour of loafing at the end of the trip.

Predicts Great Wealth

B.C. Professor Propheesies Big Mine Output In Twenty Years

"It is practically certain," Professor John A. Turnbull of the University of British Columbia, prophesied to the Vancouver Island Prospectors Association, "that 20 years hence the mines of British Columbia will be producing somewhere about \$2,000,000,000 per annum. We are permanently on the upgrade, and our production and mining prosperity will go on increasing. This assertion is justified by statistics. We are a young country with development ahead of us, and our greatest production will take place at a time when the supply of metals throughout the world is running low. Consequently we shall be able to command higher prices. This is the heritage we shall leave to our children."

"The snake to which I refer," said the school teacher, "is said to strike with mathematical precision."

"Do you mean an adder, sir?" suggested a bright pupil.

You can tell by the way Nature hung man's arms that he was never intended to pat himself on the back.

The Farmer's Advocate says: Tattooing in our time and country is considered only an eccentricity of soldiers and sailors, but it was practiced by pre-historic men and in different countries it was symbolic of courage or mourning, and, in some circumstances, it had religious and social significance. Tattooing reached its highest perfection in Polynesia, and even there it was crude enough, for we are told that during the operation, assistants, usually female relatives, drowned the cries of the sufferer with songs and the beating of drums. In the Marquesas group of islands, the men were frequently tattooed all over the body, even to the fingers and toes, and as each operation required from three to six months many of them must have been 30 years of age before they were completely adorned.

Tattooing is an old art and it is now being applied to live stock breeding in such a way as to prevent unintentional errors and deception. As many as 200,000 foxes bred in captivity have been tattooed, and these are easily identified as long as they live. The breeders of pure-bred Hereford cattle are already tattooing, and the Jersey breeders are about to adopt the practice.

Tattooing would be more serviceable still to the breeders of sheep and swine as a means of identification of animals that bear fewer distinguishing marks than do cattle. It is a practice that should be made compulsory for all pure-bred live stock, so as to give an added value to the certificate of registration. Equipment that is simple and ink that leaves a permanent imprint may now be obtained, and careful breeders should welcome such a system of branding their animals in order to remove all doubt regarding accurate identification.

The pedigree of an animal that bears the signature of a dishonest man is not worth the paper it is written on. A certificate of registration that bears the signature of a careless, indifferent breeder is next to worthless. The value of any pedigree is based entirely on the honesty and uprightness of the breeder, and that is a feature of all pedigrees that time will scarcely alter. But the breeder may be honest yet careless, or not adept at remembering the animals as they grow up in his pens or stalls. The breeder may pass out suddenly and leave a herd or flock regarding which no one else in the world knows anything at all. Such things have happened and the wonder is that continuity has been maintained in many herds where identification depended on one man who for one reason or another was not available at the critical time.

The tattoo system of identification is a most desirable and efficient means of preventing mistakes and confusion. It should be adopted by every breeder of pure-bred live stock in the land.

Edmonton Building Program

Over Seven Million Dollars In Building Projected For This Year

According to announcement made by different business firms and governmental bodies, over \$7,000,000 in building is in sight for Edmonton this year. The provincial government is planning to spend around \$1,250,000 on new construction which includes a new normal school, \$500,000 administrative building, and a \$150,000 extension to the University hospital is in prospect. Permits to date are six times greater than the total for the same period last year.

The wettest spot on earth is East Bengal, India. The record annual rainfall there is 429 inches.

"My dear man: why do you drink so much?"

"I am the horrible example of the Temperance Society." — Lustige Koelner Zeitung, Cologne.

BEAUTIFY CANADA

Clean Up, Paint Up, Keep It Up --- Increases the Value of Your Property

PROOF OF DYES is in the dyeing!

Words won't dye a dress, or cloth, or sweater. It takes real anilines to do that. That's why Diamond Dyes contain from three to five times more anilines than any other dye-by actual test. It's the anilines in Diamond Dyes that do the work; that give the colors such brilliance, such depth and permanence. It's real aniline that keeps them from giving things that re-dyed look; from spotting or streaking.

Next time you have dyeing to do, try Diamond Dyes. Then compare results. See how soft, bright, new-looking the colors are. Observe how they keep their brilliance. Your dealer will refund your money if you don't agree Diamond Dyes are better dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

Why Cement and Plaster Need Painting

It is seldom one sees a cement, concrete, stucco, plaster or brick surface painted. It seems to be the general assumption that these substances are amply able to protect themselves from weather and other destructive conditions.

But that is a mistake. It is well known that cement is a moisture absorbent, and it isn't true that the moisture does not harm it. It is almost as important to prevent rain from penetrating the surface of these rough mineral outside as it is to protect wood and iron from rain.

But just any kind of paint will not do. It must be a special cement paint, having a chemical composition not affected adversely by lime or alkalis.

It is important that owners of commercial and manufacturing buildings, grain elevators, residences, garages, silos, etc., with absorbent outside surfaces, should realize the advantages of painting them—that they will last longer, look better and need fewer repairs after being so treated.

Many accidents happen from varnish and other mixtures that contain inflammable liquid. Almost every day it happens. "Happens" does not seem to be the best word to use, however, for it is discovered that such "accidents" (an other wrong descriptive word), are usually the result of want of common house sense.

Anybody should know that to place highly inflammable substances like turpentine and benzine by a hot or even warm stove is more than likely to cause an explosion. "She was heating a pot of varnish on the stove and it exploded." Of course it did; did she think it would simply boil over, like a pot of soup?—Painters' Magazine.

Moose Jaw Board of Trade
The recent three days' drive for membership in the Moose Jaw Board of Trade, with an objective of 1,000 members, went over the top with 1,200 paid up members secured.

Lady in library: "Have you been reading Longfellow?"
Roughneck: "Now, only about ten minutes."

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Had Thought For Troops Prince Of Wales Countermanned Order For Parade Owing To Weather

On the day the Prince of Wales presided over the first Royal levee of the year at St. James's Palace, Pall Mall, London, elaborate ceremonial had been arranged. He was to drive in a silver and gilt coach from Buckingham Palace, the King's London residence, to St. James's attended by a squadron of the Horse Guards in full parade equipment, including highly polished steel cuirasses and enormous busbies.

The weather turned intensely cold, and the discomfort this parade would have occasioned—not to himself, for he would have been well sheltered in the coach, but to the troops that were to take part—at once appealed to the Prince. Half an hour before the ceremony was to begin, therefore, he quietly countermanned it, and waited for the modest bachelor quarters he occupies in York House near by. Little was said about this at the time, but a few of the 47,000,000 inhabitants of some gray little islands in the Northern Seas took note of it and approved.

Home Decorations

A little money goes a long way in furnishing a home if it is wisely spent. A plain painted wall in a light, pleasant color, or light-colored monotone or neatly patterned paper, does not cost very much, but goes a long way toward giving a room a fresh, smart appearance.

Bright colored cretonnes add a note of gaiety and cheer to windows. Ugly or cumbersome pieces of furniture can be replaced by inexpensive wicker or cottage furniture. Nondescript chairs, stables and tables can be painted pleasant colors, giving accent to the furnishings of the room. Worn-out upholstery can be covered with slip covers of denim or cretonne, or reupholstered in inexpensive wool repp. New silk or parchment lamp shades and pillows of quilted silk or bright linen adorned with wool embroidery or applique add to the up-to-date appearance of the room. Well designed scatter rugs, rag mats, and the delightful new linoleums make charming and inexpensive floor coverings.

Air Service From Seattle To Alaska

Proposed Route Via British Columbia Has Been Surveyed
The International Airways will start a passenger service from Seattle to British Columbia and Alaska early this summer, operating eight-teen-passenger seaplanes, P. T. McCarty, president and general manager of the company announced. The service will include stops at Vancouver, Prince Rupert, Ketchikan and Juneau. A branch line may be extended from Juneau to Sitka.

Mr. McCarty and a party of four others, completed a survey trip of the proposed course, making a round trip from Seattle to Juneau by seaplane.

Invents New Auto

British Engineer Claims Machine Capable Of Great Speed
Amburst Villiers, young British engineer, is reported to have completed the design of a motor car which he will take to Dayton in 1931, with a guaranteed speed of 300 miles an hour and a theoretical maximum speed of 400 miles.

For the first time wireless will be used for steering, but the details of this were kept secret. The engines will have 3,000 horsepower, and the car will be fitted with eight wheels. Prominent British financiers are providing the money.

Was Very Careful

A man had recommended a friend of his for a job. "Is he fond of work?" asked the manager of the works. "Fond of it?" cried the friend! I never saw a man who could take such good care of work as he does. One piece of work will last him for a week."

"My Lord," said the foreman of an Irish jury, when giving the verdict. "We find the man who stole the mare 'Not Guilty.'"

"How's everything at home?"
"Oh she's all right."

SUNDAY SCHOOL LESSON

APRIL 28

THE SUFFERING SERVANT OF JEHOVAH

Golden Text: "With His stripes we are healed."—Isaiah 53.5.
Lesson: Isaiah 52.13 to 53.12.
Devotional Reading: Revelation 5. 9-11.

Explanations and Comments

The Servant of Jehovah.—Who is meant by the term? In the words of the Ethiopian eunuch (Acts 8.34), "Of whom speakest thou the prophet, this? of himself, or of some other?" Philip, to whom the eunuch spoke, immediately took the passage which we study today, and from it, preached Christ.

Incidental allusions to the Servant of Jehovah are scattered throughout the second part of the Book of Isaiah, but the main passages are these: 41.8-20; 42.1-7, 18-25; 43.5-10; 49.1-9; 50.4-10; 52.13 to 53.12.

The "Servant" a personification, or a person? If a personification, was he the Israelitish nation as a whole, or the best portion of that nation—the righteous nucleus? The exiles in Babylon, or that part who remained loyal to Jehovah throughout all the trials of the exile and thus kept alive the true religion? If a person, was he ideal, or real? A prophet, or Hiesekiah, or Jehoiacham? Or was he still to come, the promised Messiah? Each of these interpretations are ably defended by scholars.

The "very name of individuals and nations, those who would be great must become the servants of all. Jesus Christ is the only perfect illustration of altruism. Selflessness is the curse of the world. Christ brought help because he was the perfect 'Servant' of Jehovah, consecrated to unselfish service. Servantism and service must characterize every life that ministers to the health and strength of humanity."—John T. McFarland.

The Later Exaltation Of The Servant of Jehovah, 52.13-15.—In these last two verses of the fifty-second chapter of Isaiah, God is represented as the Speaker. (In 53.11, 12, He is suddenly introduced into prophecy, as "My Servant," he who executes my will, shall do so wisely as finally to be exalted. But just as many were astonished because they could not understand His sufferings, His visage and form disfigured by disease; so when he is exalted he shall startle many nations, kings shall be silent with surprise when he is really known and understood. ("The word 'servant' is difficult and obscure and perhaps not original. The Greek version reads 'many nations will marvel at him.'")

The Servant Of Jehovah A Man Of Sorrows, verses 1-3.—The prophet is now the speaker. "Whenever a 'we' is suddenly introduced into prophecy, it is always Isaiah that speaks, since the prophet takes the nation along with himself."—Delitzsch. Who hath believed our message, and to whom hath the arm of Jehovah been revealed? He refers seemingly to the rejection of his already spoken word, the substance of 42.1-4; 49.1-6; 50.4-9. "The tenses in verses 1-3 are past (prophetic perfect), the future being viewed as already accomplished. The implied answer to the question is 'No one.'—Dummelow. The 'arm of Jehovah' is a figure of speech for the work of Jehovah; the sending of the 'Servant' is his work. He was despised, and rejected of men; man of sorrows, and acquainted with grief. "What an illud of woes is condensed into these words!" and as one from whom men hide their faces he was despised; and we esteemed him not. Men turned their faces away from Him with loathing. Many see in these words a suggestion of leprosy, and refer to Job. 16.6.

The Cost Of Corrosion

In a paper read before the Institution of Civil Engineers, by Sir Robert Haffeld, on "The Corrosion of Ferrous Metals," the startling statement was made that, according to his estimates, 25,000,000 tons of steel were lost by rusting in 1920. At 20 pounds a ton this would represent for the year the huge bill of 500,000,000 pounds, to which might be added another 120,000,000 pounds spent on operations rendered necessary by the corrosion. These figures refer to the whole world, but the "Electrical Review" pointed out, the major part, say 450,000,000 pounds would probably have to be debited to the British Empire, a sum equal to nearly half our total war indebtedness to the United States.

The girl with a broken heart all ways manages to save the pieces.

Pictures and Mirrors Give Finishing Touch

Pictures serve an admirable purpose in the decoration and furnishing of the small home.

By the very nature of their location on the wall they occupy none of the floor space that is so valuable in the small dwelling. If a little room has been rather crowded with furniture, pictures on the wall carry the eye upward and bring the attention from the lower part of the room to the upper, where there is a greater appearance of space.

Then, too, the subjects of the pictures may be chosen with a view to increasing the apparent size of the room. Pictures with a rather deep perspective give the eye a feeling of looking into the scene, down a corridor, into a valley, along a river, or otherwise creating an appearance of distance.

To do this removes much of the cramped feeling that invades a small room overcrowded with furniture. The choice of color in pictures also will have much to do with the decorative scheme of the room, and the same effect of spaciousness can be created with the judicious use of mirrors.

The Part Paint Plays

"Where poverty lives, there filth abounds." Someone wrote or said that a long time ago and it is quite true today. The solidity and prosperity of a town, or its poverty and shiftlessness, are indicated by its physical appearance.

"Paint and Pride Are Partners," is one of the slogans of the "Clean-up and Paint-Up Campaign," and it is a good one. "The greatest incentive to cleanliness is paintiness," is another true one.

Any community cleaning that lasts requires the paint brush even more than the scrub brush. Walls and other surfaces which are properly painted, enameled or varnished, are washable. They are easier to keep clean. Good paint and varnish reduce the labor of keeping clean, promote health, inspire pride of ownership, multiply the joys of living and increase property values. There is no better time to paint up than when you are cleaning up, and there's little hope of keeping your premises clean up unless they're painted up.

The Dandelion Digger

The dandelion is a pretty little flower for a few hours. Then the blossom becomes an unsightly tuft of seeds which are lifted by the slightest breeze and blown over the yard or throughout the neighborhood. Then the dandelion soon becomes an unsightly weed which disfigures an otherwise beautiful lawn.

Dandelions attract mosquitoes and other undesirable insects. Get rid of the dandelion by enlisting the services of the children! Organize them into an army of dandelion diggers.

Any self-respecting home owner will pay the little tots ten to twenty cents per hundred for dandelion and other weeds that mar his lawn. You can appeal to the pride of the little folks by making them soldiers in this special army of fighters, and you will please them by a small cash reward for their work.

Grocer—"Then you don't want no cranberries?"
Customer—"No, I've changed my mind. I see your cat is asleep on these cranberries."

Grocer—"Oh, that'll be alright. I don't mind wakin' the cat up."

W. N. U. 1782

CONFERENCE ON REPARATIONS ENDS IN FAILURE

Paris.—The second reparations committee has failed in its purpose to re-estimate German reparations for the damage of the Great War.

The conference, which for ten weeks has been engaged in an effort to set a figure mutually acceptable to the allied nations and to the German republic seemed definitely wrecked.

A sub-committee was appointed to prepare a report to the several governments stating the "why" of the failure. This sub-committee, conceivably, may furnish a loophole through which revival of the conference could be sought but general opinion did not anticipate such a development.

Dr. Hjalmer Schacht, chief of the German delegation, made continuation of the conference hopeless when he stated definitely that payment of even one-half the total sums demanded, must be conditional on abolition of the Danzig corridor, revision of the frontier of upper Silesia and immediate return of the Saar Valley to Germany.

A sub-committee, headed by Lord Revelstoke, had met to endeavor to bring about an agreement between the Germans and the allies on the first ten or fifteen annuities.

Discussion never got beyond the first annuity. Dr. Schacht declared that Germany would never under any circumstances pay annuities greater than 1,610,000,000 marks (approximately \$396,000,000), and for no longer than 37 years. She would make these payments, he concluded only if the allies made it possible for her to increase her ability to pay by giving her access to raw materials and other resources of which she was now deprived.

One of the allied experts immediately remarked that "Dr. Schacht wants the experts to revise the treaty of Versailles, which was certainly not comprised in our terms of reference."

The chief of the German delegation was then told plainly that his attitude led finally toward breaking up the conference, with the result that reparations payments would revert to the Dawes plan under which Germany must pay 2,500,000,000 marks annually (approximately \$625,000,000) instead of 1,800,000,000 marks (approximately \$450,000,000) demanded by the allies for the first annuities.

"I understand," replied Dr. Schacht, "but it will be impossible for Germany to execute the Dawes plan and she will necessarily demand that the clause giving protection against ruinous transfers comes into play."

The allied and American experts now are unanimous in agreeing that there is no further hope of coming to terms with the Germans.

Snubbed By Chicago Mayor

Thompson Sent "Collect" Cable To Young Australian League

Chicago, Ill.—Mayor "Big Bill" Thompson's political enemies were making the most of the official snub the cowboy mayor has extended to 360 members of the Young Australian League who plan to visit Chicago, April 22.

The youthful British subjects called Mayor Thompson that they were coming. Instead of extending them a welcome, Thompson sent them a "collect" cable saying that Chicago had many interesting sights. It cost the Australians \$25 to learn that the Mayor, famous as a detractor of King George V., was not enthusiastic about their visit.

Commenting upon the slight editorially, the British American, published in Chicago, said: "We can scarcely believe Big Bill would be guilty of such stupidity."

The Australian delegates will be welcomed by the Association of Commerce, Rotary, and the English Speaking Union.

Seeks Entry Into Norway
Oslo, Norway.—Refused entry into Germany, Lon Trotter, exiled Russian Communist, is seeking permission to come to Norway. The government will take the matter under consideration.

Rural Credits In B.C.
Victoria, B.C.—Offices of the federal farm loan board have been opened here by the chairman of the provincial committee, George Sangster. One thousand applications for rural credits already are in.

W. N. C. 1782

Report Is Satisfactory

Sir Henry Thornton Pleased With Record Of C.N.R.

Ottawa.—The special standing committee of commons on Canadian National Railway affairs held its first meeting recently, when General Flet. Liberal, Rimouski, was elected chairman. Sir Henry Thornton, president of the Canadian National Railway, stated that the report of the railway showed the calendar year 1928, was the most satisfactory of its history, both financially and from an operating standpoint.

Out of every dollar traffic receipts earned by the C.N.R., 17.61 cents was available for interest. On United States class 1 railways only 15.21 cents was available for interest. Sir Henry thought this was very satisfactory, particularly as many lines were in new districts.

To the question whether the increased receipts of the C.N.R. were at the expense of the Canadian Pacific, or attributable to national growth, Sir Henry said the net earnings of the Canadian Pacific attained a record last year.

"Therefore, I should say," Sir Henry asserted, "if I were a C.P.R. official, that the National is an asset to the Canadian Pacific. As a C.N.R. official, I consider the Canadian Pacific is an asset to the C.P.R. down into Nova Scotia," asked Colonel Cantley, Conservative, Pictou.

"Well, the C.N.R. is not yet a Christmas tree," Sir Henry replied. As to whether another large wheat crop was expected this year, Sir Henry explained it was impossible to forecast any particular year. However, there had been a steady and progressive increase in the quantity of wheat produced, extending over a decade of years.

He explained that it was generally considered that the Great Lakes had a sixty-year cycle of high waters and similar cycle of low waters which must be ascribed to the precipitation. Canada was entering on the wet cycle now and it might be projected that the greater rainfall would result in greater crops.

The heavy carryover of wheat would assure much business in grain carrying this year.

Colonel Geary, Conservative, Toronto, inquired if there had been any adjustments in railway rates. Sir Henry replied that rate reductions effective in 1928 had reduced the revenue of the Canadian National Railway by \$908,000 as against 1927. Colonel Geary further inquired if there had been any let-up on the maintenance standard of the system and was informed that the reverse was the case, a constantly high standard being adopted.

The minister of railways explained that the Hudson Bay Railway was not in the accounts of the National Railways. The C.N.R. was simply acting as the agents of the government in constructing this railway.

Urges That Strict Measures Be Taken

Members Of Manitoba Legislature Would Prosecute Careless Motorists

Winnipeg.—Prosecution in every case in which a fatality occurs as a result of improper driving on the highways of Manitoba was urged by several members in the Manitoba legislature during a discussion which members hoped would serve to bolster respect for law and reduce the number of serious accidents. One member declared "pedestrians were not even safe on the sidewalks" while another deprecated the "stress" of the high speed possibilities of motor cars by manufacturers and salesmen.

Stop Search For Lost Radium

Saskatoon.—The scientific search which has been carried on for two weeks in a vain endeavor to locate \$5,000 worth of lost radium has come to a stop. In the last stages of the intense search two hop operated radio sets were used without avail. The reward of \$500 still stands and it is still hoped that someone will find the little red para-rubber tube with its precious contents.

Voting On Liquor Control

Halifax, N.S.—"Are you in favor of continuing the Nova Scotia Temperance Act?" will be the form of the question submitted to a referendum vote of the Nova Scotia electors this fall. A special committee appointed by the house of assembly drafted the above question in favor of a previous proposal that a vote be taken on the desirability of establishing a system of government control and sale of liquor.

DEATH OF SIR CLIFFORD SIFTON, NOTED CANADIAN

New York.—Sir Clifford Sifton, K.C.M.G., K.C., prominent in Canadian public life for forty years, died in New York while sitting in a chair talking with his son, Harry. Accompanied by his sons, Sir Clifford left his winter residence at Daytona Beach, Fla., last Saturday, and was on his way to his home in Toronto when death overtook him.

Although Sir Clifford had been troubled with heart weakness for about two years, his health was fairly good until last fall and he was quite sick when he left Toronto in November to go to Florida for the winter.

Sir Clifford Sifton, K.C.M.G., K.C., of Toronto, Privy Councillor, former Minister of the Interior, whose death took place at New York, had been a figure of magnitude in Canadian public life for forty years. Born in Ontario, in 1851, he came to Manitoba when a youth with his father, the late Hon. W. J. Sifton, locating at Brandon.

A barrister at the age of twenty-one, Clifford Sifton became a member of the Manitoba legislature in 1888, and entered the Greenway government as Attorney-General in 1889, being only twenty-nine years of age. From that time onward he played a conspicuous part in the development of the West.

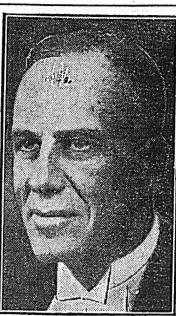

Sir Clifford was called by Sir Wilfrid Laurier to the Federal cabinet on November 17, 1896, as Minister of the Interior and Superintendent-General of Indian Affairs. As Minister of the Interior he carried out a vigorous immigration policy, which added largely to the population of the Dominion. In the earlier period of his ministry he was especially charged with matters relating to the government of the Northwest Territories (now Saskatchewan and Alberta), and Yukon Territory, and all unorganized and outlying territories of the Dominion. He introduced and carried through legislation at Ottawa giving responsible government to the Northwest Territories in 1898.

On account of a difference of opinion with the Premier, Sir Wilfrid Laurier, over educational clauses of the Northwest Territory Autonomy bill, Sir Clifford resigned from the Government, February 27, 1905. He continued to be a member of the House of Commons until the General Election of 1911, when he withdrew and did not present himself for re-election. He represented Brandon, Manitoba, in the Dominion Parliament from 1896 until 1911, his first election to the House of Commons being by acclamation, following upon his call to the ministry at Ottawa.

Wins Prize For Play

Toronto.—The \$100 prize for the best one-act play submitted for the Imperial Order Daughters of the Empire, 1929 competition has been awarded to Don Wetmore, Wolfville, N.S., for his play entitled "The House of Laval." Several other plays submitted have received honorable mention, including "The Lady and the Land," by E. E. Checkley, Victoria, B.C.

MAY HEAD GRAIN BOARD

Chief Justice J. L. Brown of Saskatchewan, who, it is stated, has been offered the chairmanship of the Canadian Grain Board, reorganization of which is reported as imminent.

To Investigate Salaries

Committee To Go Into Matter Of Salaries Of Technical Members Of Civil Service

Ottawa.—The three men selected to investigate the salaries of technical and professional members of the civil service are: E. W. Beatty, president and chairman of the Canadian Pacific Railway; Sir George Carneau, of Quebec City, and Dr. Murray, of the University of Saskatchewan, Saskatoon. This was announced by Hon. J. A. Robb, finance minister in the House of Commons. "It has been represented," Mr. Robb said, "that the remuneration provided in the government service is no longer attractive to persons of superior technical or professional training."

"The report made last year by the civil service commission recommends a graduated flat increase of from \$240 to \$420 per annum. This would apply to 1,936 persons, and involves \$690,000 to one class, and \$60,000 to another, or a total of \$750,000."

Offers Billion Marks Less

Germany Wants Big Reduction In Yearly Reparations Payments

Paris.—Germany's counter plan for paying her great war reparations, presented to the allied experts by Dr. H. Schacht, chief of the German delegation, is understood to offer one billion marks less per year than the creditors demanded.

Payments would continue thirty-seven years instead of the fifty-eight years proposed by the allies in their memorandum. The German offer envisaged annuities beginning at 1,100,000,000 marks and rising to 1,450,000,000 marks.

Unemployment Insurance

Ottawa.—The meeting of industrial and international relations committee of the house of commons took steps to prepare its report on insurance against unemployment, sickness and invalidity. The members of the committee for the most part agreed with A. W. Neill (Ind.-Comm.-Alb.), that it would be a different task to prepare a report with any degree of definiteness because of the attitude taken by the province.

Radio Links Arctic and Antarctic Zones

Recent Broadcast Heard Over Distance of 10,000 Miles

Copenhagen.—The first radio communication between the Antarctic and Arctic zones was reported in a cablegram received here by the newspaper Ekstrabladet from the Mount Evans Greenland, radio station.

Mount Evans said a recent broadcast by Commander Richard E. Byrd's station in the Antarctic was heard excellently, although from a distance of more than 10,000 miles. Gasoline reserve supplies have been sent from Mount Evans to Camp Lloyd in preparation for Swedish-American trans-Atlantic flights next summer, the cablegram added.

GRAIN INSPECTION SYSTEM SAID TO BE ANTIQUATED

Ottawa.—Standard samples set each year by the chief grain inspector are frequently higher than the minimum set by the Grain Act, and on that account cargoes are graded lower than they should be. This was the contention of John Gillespie, dealers' representative on the grain standards board, whose evidence was continued before the agricultural and colonization committee of the house of commons.

This was the chief complaint, Mr. Gillespie said, against the inspection department. The whole inspection system was antiquated. For instance, barley was never graded No. 1 or 2, although there was lots of excellent barley produced. The Grain Act had been completely ignored for years. If the act were followed in setting barley samples it would benefit the growers.

In one case barley which weighed 46 pounds to the bushel had been refused No. 4 grade when the definition in the act did not require over 45 pounds. The reason given for refusal was that the carload was not as good as the standard sample in the hands of the inspector. This sample had weighed 49 pounds.

Hon. James Macdonald, minister of trade and commerce, pointed out that there was an absurdity in the act in that connection. The definition for No. 4, actually required that the barley, to be so graded, should weigh less than 45 pounds.

In another case on appeal in regard to wheat graded No. 4, which the shipper thought should be No. 3, it was shown that it deserved the higher grade under the terms of the statute. It was refused that grade, however, because the standard sample was higher than it should have been to represent the minimum.

Millions of bushels of Alberta wheat were graded No. 4 this year when it deserved No. 3 because there were not different standard samples for that province, Mr. Gillespie contended. A volume of Alberta wheat had a larger percentage of green kernels than the Winnipeg sample, but in other respects was often superior. In any case he had never heard of complaints by Old Country buyers against a percentage of green kernels. This did not apply, of course, to wheat which was largely unripe.

The sentiment of pools, trade and producers, was that there should be different standards for Alberta grain. It was of a different type from the Manitoba and eastern Saskatchewan, and no one sample could be made which would be representative of all the grain in the west.

There is no advantage in shipping to the United Kingdom grain of any better quality than the standard samples sent each year because no better price will be received by the producer Mr. Gillespie said.

Buyers on the European grain exchanges set the price each year on the basis of the samples sent over early in the season by the Canadian government. If wheat of better quality appeared later the Canadian farmer would lose, he claimed.

The work of the laboratory of the Board of Grain Commissioners in Winnipeg did not have much effect on the price obtained. The billers in the Old Country made up their mind on the samples and even had information before the standards were set, because they had agents in Canada who were always taking account of conditions.

Protein content is only one factor in connection with wheat prices, Mr. Gillespie continued. It was impossible to grade wheat on protein content because No. 1 wheat and No. 3 wheat of the same protein percentage could not be blended together. They would not have the same milling value.

NEW SCHEME TO SETTLE PEACE RIVER DISTRICT

Edmonton.—Settling of 1,500 families in the Peace River District under an ambitious scheme which has been submitted to the provincial government, is proposed by the Bowen Utilities Corporation Limited. It appears that the furtherance of the scheme depends on what stand is taken by the province, as the federal authorities will not act without the approval of the Alberta government.

The scheme is said to involve an expenditure of \$10,000,000, while backing has been assured by industrial financial interests in the Old Country, according to A. D. Bowen, head of the company. The settlement would be in the ten townships, beginning in township 74, range 21, east of the D. and E. C. Railway at Aggio, and then west and south to Sturgeon Lake. British settlers would be brought out, while a saw mill, pulp and board mills would be operated, thus providing employment.

The company would build a trackway through the entire area, construct serviceable roads on each section line, clear the land for cultivation, and build a house and barn on each quarter section for the occupancy of each settler, who would acquire the land on long time terms. "The federal government at Ottawa is quite ready to make the reservation if there is no objection from the provincial government," said Mr. Bowen. "If satisfactory arrangements are made, we would make a start by bringing out 50 settlers this year."

Japan Asks Clearer

Wording Of Pact

Phrase In Kellogg Peace Pact Contrary To Constitution

Tokio.—Katsuji Debuchi, Japanese ambassador to Washington, has been instructed to obtain an understanding from the American government on the question of the phrase "their respective peoples" in the Kellogg peace pact.

This phrase is incompatible with the Japanese constitution, which stipulates that all sovereignty lies in the person of the emperor. The newspaper states that if America rejects the Japanese reservations then Japan will issue a statement explaining that ratification is impossible, but emphasizing that Japan fully approves of the pact's spirit.

The reservation, it is reported, suggest the deletion of the objectionable phrase, a revision, or a special explanation. Such a modification will require the consent of all the contracting powers.

Lower Postal Rate

With France Arranged

Letter Rate To Be Three Cents Per Ounce Instead Of Eight

Ottawa.—Hon. P. J. Veniot, postmaster-general, and the deputy minister, L. J. G. Groulx, will leave for Paris at the close of the present parliamentary session to sign a new postal convention between Canada and France. By the terms of the convention the letter rate between the two countries will be reduced from eight to three cents an ounce.

The new postal rate, it was explained, will facilitate communication between the countries and is the outcome of negotiations which have been carried on for some time between representatives of the two governments.

Claims Large Amount

For Customs Taxes

Defaults Of Payment To Government Over Seven Million

Ottawa.—A total of \$2,370,782.51 has been recovered during the past three years from persons and corporations by the government in connection with defaults of payment of customs and excise taxes, disclosed in the inquiry of the royal customs commissions. Still outstanding, and claimed by the department of national revenue as due the government, is the sum of \$7,114,492.73. This was disclosed in a reply tabled in the House of Commons by Hon. W. D. Fisher, minister of national revenue.

Ister Parliament

Belfast, Ireland.—Parliament was prorogued with the usual ceremony.

It was officially announced that the Ulster parliament would be dissolved on May 2. Elections will be held May 22.

Immigrants

The word immigrant has lost a great deal of its old significance in this country. Once it described one who was escaping from a life of suffering and hardship to an unknown land of freedom but of uncertain opportunities and possibilities. The modern immigrant is typified in the seven girls photographed above who were recent arrivals on the Canadian Pacific "Duchess of Richmond." Their future as domestics in the city of Toronto was assured before they left their homes, and the comfortable quarters they occupied on the regal Atlantic vessel was a long cry from the accommodation they must have endured had they been but one generation earlier.

Building Speedier Cars

Forty Miles On Highways No Longer Considered Good Going

Rending the automobile advertisements, it is not uncommon to see certain manufacturers proclaim as one of the merits of their high-priced cars that they will do seventy and eighty miles an hour. Now, an automobile expert states that within the next ten years cars will be built for the public highways—not for the speed track—which will do one hundred and twenty miles an hour or more.

One may ask, "Why?" Not so long ago speeds of thirty to forty miles on the roads were considered good going, and most drivers were satisfied with that rate. But in the stress of competition, manufacturers began turning out cars of higher speed, going one better than their competitors, although the laws of the land did not sanction anything like the speed named.

There is no law against building autos to sell for use on the highways which are capable of tremendous speeds, and the producers are careful to exploit the speed capacity as providing a substantial reserve of power for hills, or some such claim as that.

And so speeds are greater—and the death list grows higher every year.

It seems inconsistent for governing authorities to pass laws limiting the speed of autos, and to take no action whatever against the production and sale of autos which can travel twice as fast as the maximum allowed.

But the time must come, if cars are to be built that will do one hundred and twenty miles an hour on the roads, when public bodies will have to take some action. Highways are not built for such speeds—and undoubtedly men who have cars equal to that speed will utilize their power on clear roads—and the alternative is to build super-highways for super-cars.

It is taking governments all their time now to cope with the present highway needs, and unless they are to be forced into a new program of costly highways within the next ten or twenty years, there will have to be some general legislation to limit the speed capacities of automobiles of the future.

A Valuable Hen

Barred Plymouth Rock At Saskatchewan University Sets New Record

The poultry department of the University of Saskatchewan astonished the poultry world, last year, with a barred Plymouth Rock hen that laid 339 eggs in her pullet year. This was a record for a hen of the heavy breeds. A daughter of this hen seems likely to beat her mother's record. Hatched on February 23, last year, she laid her first egg on September 3. Up to April 12, she had laid 215 eggs, which is 10 more than her mother had laid up to the same corresponding date. During November, December and January, she laid an egg on 71 consecutive days.

Makes Model Of Devon

Englishman Has Reproduced Every Detail With Simplest Tools

With the simplest hand tools, an ingenious Englishman named Martin, has made a remarkable model of Devon and the surrounding country.

Over 50,000 parts have already gone to make up the completed sections. Railway coaches consist of 5,000 separate parts, and are complete even to the views and mirrors over the seats. The wheels of a bicycle, although only the size of a penny, have twenty-eight spokes. When complete the model will be 30 feet in length.

Publisher: For me to publish novels, the author must have a well-known name.

Author: That is all right, mine is Smith.

"How old are you, little one?"
"I don't know mummy was 20 when I was born and now she is 28."
—Buen Humor Madrid.

W. N. U. 1782

Growing Flax For Seed

Canada Is Supplying Requirements Of Irish Flax Growers

During the past two years seed has been produced in Canada for the requirements of Irish flax growers and, according to the Minister of Agriculture, further progress in establishing this market was made in 1928, some 1,200 bushels of seed having been shipped. Because of certain factors, the Irish climate, while suited to fibre production, is unsuited for seed production, and Irish authorities became interested in the possibility of Canada producing their seed. Initial efforts, have been attended with gratifying results. What this stimulated interest in the production might eventually mean to Canada may be gathered from the fact that requirements run to 5,000,000 pounds of seed annually.

With this trade in view, experimentation was commenced in 1927 with a new variety of seed known as J. W. S., developed by the Linen Research Institute of Northern Ireland. The flax fibre division of the Experimental Farms became interested in growing this as a fibre crop in those parts of the Dominion where climatic conditions had been proved favorable to the production of fibre of good quality and length. This stimulated interest in the production of flax fibre in Canada, and its cultivation is making some progress at the present time.

The chief domestic use of Canadian fibre flax, says the Brandon Sun, is as "green tow" in the upholstery industry. Some exports in this form go chiefly to the United States, these amounting in the first six months of the present fiscal year to 1,067 cwt. worth \$4,121. Canadian fibre is used in a linen yarn and spinning mill in Ontario, and the Canadian linen industry could absorb a greatly increased supply. In 1927 flax in the form of "green tow" was exported to Scotland for use in the linen industry by a new process, and this market is stated to be promising.

Canadian Wheat Grades Higher

Worth From Five To Ten Cents More Per Bushel Than United States Wheat

Before the Senate committee on agriculture at Washington, in connection with the farm relief hearings, H. J. Beasley, in charge of the grain division of the United States Department of Agriculture, said that in the world market Canadian wheat was worth from five to ten cents more than United States wheat on the same comparative grade. He said this was due to the general opinion of world buyers as to the excellence of Canadian wheat.

Mr. Beasley was asked many questions by the committee as to comparative prices on wheat between Minneapolis and Winnipeg and he finally summed the situation up by saying that the buyers in the world market put value of Canadian wheat five to ten cents higher.

Moose Is Domesticated

Has Been Grazing With Cattle On On Alberta Ranch

The Hs Alta Ranch in Alberta has an unusual visitor. Feeding lonely, a fine moose has come down out of his rocky habitation in the mountains, and has been grazing with the cattle. It is being watched with interest by the manager of the ranch and appears to be on quite fraternal terms with the cattle and mixes with them freely.

The herd take the stranger's coming as natural and do not interfere with it in any way. They have little right to, for they are prolific usurpers of a land, which once was his.

Among ancient peoples, the Babylonians counted their day from sunrise to sunrise, the Hebrews and Athenians, from sunset to sunset, and the Romans from midnight to midnight.

The tourist learns at sea that in steamship terminology a gale, a storm and a hurricane are not the same thing. A gale blows 40 miles, a storm 20 miles, and a hurricane 50 miles an hour.

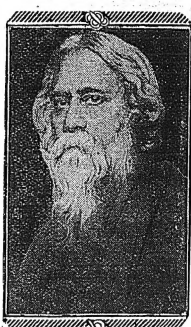

Friend: "What did you do about that woman who was arrested for speeding?"
Judge: "I followed the old proverb."

Friends: "What do you mean?"
Judge: "Fined the woman."

Pretty Waitress: "Are you the fried haddock?"
Susceptible Diner: "No; the lonely sole."

Solicitor: "Is it true your wife agreed to this?"
Man: "I can safely say 'No'; she does not agree to anything."

AN EASTERN SAGE

Although now nearly 70 years old, Bahadurramji Tagmore is still sacrificing his declining days on the altar of the university which he has founded in India, at Santiniketan, "the home of peace." He attended the educational conference held recently at Vancouver, he having undertaken this mission at the invitation of the viceroy of India.

Canadians Use Franchise

Larger Average Vote Than In U.S. Or Great Britain

Figures show that about seven out of ten qualified Canadian electors cast their votes on an average at each election. This is a creditable percentage as compared with the United States, where the average percentage is 45, and Great Britain, where it is only 20. Yet in compulsory voting there are dangers which make it too risky an experiment to be worth trying because the masses who are driven to the polls in obedience to the law may completely offset the will of the electors who have given careful thought to the issues.

Three Of A Kind

A man and his wife were returning from Europe. The man died on the boat and a collection was taken to help the widow. When the captain counted the money he found he had \$500.3. "There must be a Scotchman on this boat," said the captain.

"Yes, sir," replied a voice in the crowd, "there are three of us."

College Nephew: "One thing Uncle, you've got to admit that College makes a man think."

Uncle Ben: "Yep, it makes him think he's better than anybody else!"

"Never despair; behind the clouds the sun is still shining!"
"Yeah, and below the sea there's a solid bottom, but that doesn't help you any if you fall overboard."

ADMIRAL'S SON COMES TO CANADA

Lured by Canada's vast open spaces and her wonderful possibilities Edward Grenville Bardwell Kiddle, son of Admiral Sir Charles Kiddle, R.N., has come to Canada to take up farm life. He was one of a party brought from England on the Cunard Liner "Ascania," recently arriving at Halifax and boarded a Canadian National Railways train for his destination in the Canadian West. Sir Charles is of the opinion that farming in Canada offers a great future. The Admiral's son was employed with a firm of chartered accountants in the Old Country before deciding to take up farm life in Canada. The party was gathered under the auspices of the British Immigration and Colonization Association with the aid of the Colonization Department of the National System.

Sweden's Forestry System

Could Be Copied With Profit By Other Countries

The people of Sweden have been celebrating the one-hundredth anniversary of the establishment of their present governmental system of forestry.

But solitude for the trees is no matter of a mere century with the Swedes. As early as the year 1284 Sweden, by royal edict, was beginning to put restrictions upon the indiscriminate cutting down of trees. In the year 1147 a royal letter commanded that for each felled oak or beech tree two other trees of the same kind should be planted.

A great meeting was held last summer at the Swedish College of Forestry, and experts from many countries, including several from the United States, were present to hear the Swedish foresters tell how forest crops may be harvested while the nation's forest resources continually improve. A general forest survey in Sweden showed that the reserves of timber are greater even than had been supposed. About half of Sweden's exports today are forest products. Though the climate is not too favorable, and there is hardly tillable land enough to produce its own food supply, Sweden is one of the most prosperous countries of Europe. The Swedes know how to make the most of their resources. This is shown by the forestry statistics, the annual growth now exceeding her annual cuttings.

A Good Smuggling Scheme

Milk Brought Into Britain As Decoration On Handkerchiefs

English customs officials are determined to stop the smuggling of milk into Britain. Recently a London firm received a consignment of children's handkerchiefs. The handkerchiefs were described as cotton. So was the embroidered kitten in the corner of each. They were. The firm received a stern letter from the authorities warning them that they could be fined if the offence occurred again. An enterprising official had discovered that each cotton kitten was provided with four tiny silk whiskers.

Turner Valley Oil Field

Royalty (Imperial Oil Limited) is now drilling 16 wells in Alberta, thirteen in the Turner Valley field, one on the Highwood River, one along the Bow and one down in the Siff field near the Montana border. The 1929 programme calls for the drilling of twenty new wells.

Magistrate: "You say defendant struck you three times and knocked you down?"

Witness: "He did, sir."
"And what did you do then?"
"I asked him if he'd finished."

Huge Trade In Oranges

Single Tree Produces From Two To Three Thousand Yearly

When you are enjoying your orange do you ever think of the home and peculiarities of the popular fruit. We have all been familiar with the pipskin kid, the blood, or ruby orange, the dark and bitter one from Seville for marmalade purposes, and the little Tangerine. But what of the natural features of the trees? And whence come our supplies? Some of them come from Spain, and large quantities of oranges are sent from Africa, Florida and California. The leaves of the trees are evergreen, and do not change color or fall off in the autumn, as do the leaves of most trees. They are dark and shiny, and if we were to hold one against the light you would see it was covered with small transparent dots, similar to the rim. These are small cells containing oil, which is pressed out and used. The blossom is like white wax with a bunch of threads with golden heads in the centre, and has a delicious scent. And as to the wonderful yields of the fruit, when it is explained that a single tree produces as many as two thousand oranges in one year, and very often as many as three or four thousand, one need no longer be surprised at the huge trade that is carried on in oranges.

Butter Production Higher

Increase In Saskatchewan Output Over March Of Last Year

Maintaining the high level of creamery butter production which has been one of the outstanding agricultural developments of recent months, butter output in Saskatchewan for March was 105 per cent. higher than for the corresponding month of 1928, the increase being from 327,217 pounds to 670,942.

Conditions in the dairy industry of the province are very encouraging and P. E. Reed, dairy commissioner for Saskatchewan, is hopeful that 1929 will establish new high records. It cannot be expected, he states, that because increases of more than 100 per cent. have been reported in each of the last four months, the production for 1929 will be double that of 1928, but present indications lead to the belief that at least a 25 per cent. increase for the year will result.

Mr. Reed attributed the gratifying progress dairying has made recently in part to the elimination of unprofitable producers from the dairy herds of the province. This culling of the "star boarders" has been made possible by regular testing for milk and butterfat production and the keeping of herd records.

Buttermilk For Laying Hens

Eggs Produced At The Lowest Feed Cost

Buttermilk for laying pullets was proved at the Brandon Experimental Farm to be superior to beef scrap or alfalfa leaves as a protein supplement. The pens under test were fed fifteen per cent. beef scrap in the dry mash, or buttermilk to drink, or alfalfa leaves provided in a self feeder. The tests were continued from late fall until the 11th of the following April. All of the birds received standard scratch grain mixture and dry mash. The results of two tests indicated the superiority of the buttermilk, as the pullets given his feed as a supplement to the usual ration laid an average of 11.3 eggs more per bird than those fed beef scrap; 16.6 eggs more than those that received the alfalfa leaves; 17.6 eggs more than those that received no protein supplement to the usual ration. According to a table that appears in the report of the superintendent of the Brandon Farm, for 1928, eggs were produced at the lowest feed cost when buttermilk was fed, followed by beef scrap, alfalfa leaves, and the check lot when no special protein feed was given.

The Important Item

"We had a fine motor trip! We saw snow-capped summits leaping toward the heavens; we saw foaming torrents raging through the bottoms of shadowy canyons; we looked down to see beetling crags into the depths of limpid lakes; we traversed geyser glades shot with flashes of golden sunlight; we—"
"How many miles to the gallon did you do?"

Demand For Farm Horses

There is a good demand for horses of from 1,250 to 1,350 pounds, though scarcely any demand at all for lightweights of from 950 to 1,050 pounds. Several carloads of the former have been shipped from High River to small farms in Ontario and Quebec at prices averaging \$65.

The Red Cross In Review

Important Work Accomplished In Connection With Convalescent Soldiers

Looking down on the world's highways through the eyes of the trained Red Cross worker, there are sights and sounds that are unforgettable in their poignant appeal to the heart.

From the white coats, row on row, in the soldier's wards come the voices of men whose memories are stirred at the sight of the familiar badge of Red Cross visitors, bringing back as it does the scenes "over there."

Today, peaceful indeed is the Red Cross field of action for these maimed men. The presenting of gifts of a loving and friendly public, who through the "Not Forgotten Fund" of a daily newspaper offer their tribute of gratitude for the sacrifices that no money can ever repay.

In the Edmonton Red Cross Unit, too, with its fine new floor laid by the convalescent soldiers themselves, and its comfortable roomy rocking chairs, may be seen a handsome new radio receiving set of modern make, the gift of the University Broadcasting Station C.K.U.A.

"Still serving the soldier" is the slogan of Red Cross even after ten years of peace, and there is and always will be much to do to ease the burdens of those who bore the brunt in the hectic days of war.

From reviewing the soldier's needs in hospitals, the Red Cross passes on to those soldiers of the soil, who under the S.E.R. are living in the hinterlands of the west. Large families of small children seem the rule with the soldier settlers, and in the homes of these heroic pioneers the Red Cross finds much important work to do.

Special protective care centres round the mother, for she it is who is giving the greatest gift and must needful to her country by adoption—the gift of a new life.

"When baby comes," with the attendant anxieties of childbirth, then comes the Red Cross, extending a helping hand to the British settler, and comforting and reassuring the young prospective mother in her hour of need.

Outposts stand ready for her reception, and for the care of sick and injured ones who face the challenge of life far from civilized centres.

One such northern hospital at Pouce Coupe, is 65 miles from the nearest town. It draws its patients from an area of 200 miles. An Alberta doctor on a health survey in that district expressed his surprise and delight at finding in that remote place a fine up-to-date modern hospital, with electric light, running water and baths. Records show that of 100 cases of diphtheria, 100 of them, its eighteen beds being filled to capacity almost all the year round. Never has the Red Cross flag waved more proudly than it does over this community where its emblem of human compassion presides over the gates of life and death in the hospital wards.

The above were one or two high lights of the Alberta Annual Red Cross Convention in the city of Edmonton when the Commissioner told what is being done for soldiers and settlers under the peacetime program of today.

"I have no more confidence in women."

"Why not?"

"I put a matrimonial advertisement in the paper and one of the replies was from my girl."

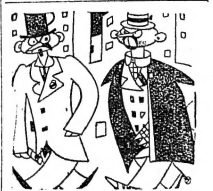

Mother: George, bring baby in to have his dinner.

Little George: He doesn't need his dinner, mother. He has just eaten a worm.

Scribbler's Wife—"What did the editor say about your poem on spring?"

Scribbler: "Too slushy."

Iron pillowslips lengthwise, not crosswise, if you wish to iron the wrinkles out instead of in.

"Men who grumble about their mother-in-law's cooking don't live in perfect harmony with mine."

"Does she live with you?"

"No, she lives in the Philippine Islands."—Buen Humor Madrid.

CHAPTER XVIII.—Continued.

"Come in," she called.

Donald followed Wainwright, his heart-beats peculiarly accelerated. For an instant he could not distinguish objects in the dim interior. Then his eyes rested on Connie, sitting demurely in the corner. She wore a gingham dress of blue, with white collar and cuffs. A dark belt was fastened snugly at her slender waist. Tiny high-heeled shoes peeped from below the hem of her skirt. Her beautiful hair hung down her back in a huge braid that fastened at the nape of her slim, round neck with a narrow black bow. She rose and crossed the room to meet him, her high heels making her little lithe body appear much taller. There was something fragile about her beauty, some of the colour gone from her cheeks, and just a hint of shadows under her eyes.

Donald held out his hand. "Good evening, I'm glad to see that you are better," he said cheerfully.

A slender, warm hand crept timidly into his, and his fingers closed on it gently as on a flower. He stared down at her, thrilled by her loveliness. She raised her eyes with her bewitchingly long lashes slowly to his face. With a sudden leaping of his heart, Donald realized that he was in love.

They talked demurely while Connie sat timidly on the edge of the uncomfortable chair. She could not feel at ease in the high, narrow shoes and the enveloping skirts. And as she essayed to cross the rough floor with an assumed air of ease, her ankle turned and she would have fallen had not Donald caught her in his arms.

As he raised her to her feet she blushed furiously, and he fancied he could feel the warm beating of her heart. With an embarrassed apology, she slipped from him, crossed to the table and lighted a candle. And presently he took his leave, Wainwright walking with him down the darkening trail.

Wainwright was in one of his brooding moods. For a few minutes he was silent. As they neared the bluff he spoke.

"After witnessing my daughter's distress the morning of the race I am afraid that you feel harshly toward me for allowing her to be placed in such a humiliating position. You have been exceedingly kind to us; therefore, I feel that I should relate the circumstances which have placed me in my present position. As I told you that day, I have allowed my pride to withhold from my daughter her inherited rights. I will be as brief as possible.

Guard Against FLU — Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "Flu" usually starts with Sore Throat. Unless the germs are killed by some antiseptic treatment a serious malady may develop.

A simple treatment is to gargle with Nerville. The antiseptic properties of Nerville quickly destroy the germs in the throat. Of course if the chest is sore Nerville should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "Flu" or colds from gaining headway Nerville will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste materials. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of Nerville and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

"My father, who took great pride in the family name, planned a political career for me even from the day of my birth. By natural taste and temperament I was quite unfitted for public life. I must have been a great trial to him, as from early boyhood I evinced a great love for the study of botany and ornithology. He would go into a red rage when he found me in the garden studying flowers under a microscope or stalking birds in the shrubbery.

"At college I was not a success, either socially or in my class. Always of a retiring nature, I did not enter social life or college sports, and the course of study set for me by my father bored me extremely.

"During my third year at college I met Connie's mother. Until that time no woman had entered my life, although my father had hinted his plans for my marriage as soon as I had finished my course.

"To my many flower shop, however small acted as a magnet. One day I stood gazing in the window of a girl's florist's shop on the Strand. A girl was kneeling among the flowers, and as she lifted her head our eyes met. She was like a golden lily. Her hair was like Connie's hair, and the blue of her eyes was the blue of the pansies she held in her hand. And her name was Constance."

He paused for an instant.

"Her father, who had been a rector in a small parish in the south of England, died just previous to our meeting, leaving his motherless child without kith or kin. Lest I weary you I may say briefly that we were married. My father would not even grant me an interview, but wrote to me saying that marrying as I had done had barred me forever from his door. I did not care. I was happy—completely, supremely happy. I sold a small estate bequeathed to me by my mother, and we set out for British Columbia.

"Ah!" he breathed softly, "that voyage! We could not afford it. But we travelled first-class—it was our honeymoon and we were young. We had never been to sea before, and the novelty of it all wore a spell about us. As we walked the deck we talked joyously of our wonderful future in the mysterious Great West.

"Our first year in Vancouver was one of blessed content. There is no love that could be greater than ours. Clerical work was scarce, so I took any job that offered. I worked here through all kinds of weather and home black with coal-dust or white with lime, and my wife would cry out merrily as she threw herself into my arms. We turned our hardships into jests."

A smile of infinite tenderness played about his eyes as memory recalled the golden days with the woman he loved.

"The next winter I was taken grievously ill. I lay helplessly on my back while my tender wife tramped from house to house teaching painting and music. Day after day made her daily rounds to keep us in the bare necessities of life, and pay the doctor's bills."

Wainwright's voice sank and almost faltered for a moment. Recovering himself, he resumed his story.

"She would come home at night, tired and worn, to fall asleep in a chair by my bedside, while I raved in a fever. She went without food to buy dainties for me. She never lost her cheery smile—but it killed her. She died giving birth to—to—Constance."

Tears rose to his eyes, and for a moment he covered them with his hand. With a great effort he continued.

"I became embittered, changed completely out of any semblance to my former self. I cursed my father. I cursed the world. I would have welcomed death, but as I looked down at the tiny mite by my dead wife's side, I knew that I must fight to live.

"A short time after, I received from my father a letter in which he asked my forgiveness. I was unfitted to make my own way in the world, yet my father had turned me brutally away. My wife had died

BOTHERED WITH ECZEMA 2 YEARS

Itched and Burned. Formed Eruptions. Healed by Cuticura.

"I was troubled with eczema on my hands, limbs and feet. It began with an itching and burning and later formed sore eruptions. The irritation was so bad that I could hardly stand it. It bothered me for two years.

"I tried different remedies but they all failed to help me. I began using Cuticura Soap and Ointment and got relief. I continued the treatment and now I am completely healed."

(Signed) Mrs. Alvah McKinnon, Tatamagouche, N. S., Sept. 27, 1928.

Clear the pores of impurities by daily use of Cuticura Soap, with touches of Cuticura Ointment as needed to soothe and heal. Cuticura-Talcum is fragrant and refreshing.

Soap 16c. Ointment 25c. and 50c. Talcum 10c. Sold everywhere. Write for Free Book, Address: The Canadian Import Co., 211 West Broadway, Montreal. Also Cuticura Shaving Stick, 25c.

from overwork and lack of food. I wrote to him in a black rage a letter that must have scorched his soul.

"For four years I eked out a miserable existence in the City. My health broke down again, and my doctor warned me that I must get to a higher altitude. I learned of this place, turned everything into cash, and came here, bringing Connie with me.

"My sole income has been derived from writing articles on Nature for the newspapers and magazines. Several times my father has advertised in the newspapers, asking me to return. I read of his death two weeks ago. For Constance's sake, I am going to start for England tomorrow."

Wainwright's head drooped listlessly as he concluded his story. All energy, all strength of bearing, bitter remembrances he had voiced had brought a look of mental anguish to his face. He stood staring mutely before him.

(To Be Continued.)

Recipes For This Week

(By Betty Barclay)

SLICED LEMON PIE

1½ lemons.
2 eggs.
1½ cups sugar.
¼ cup water.
1 tablespoon melted butter.
¼ teaspoonful salt.

Grate the rind of one lemon. Peel white part from lemons and slice the pulp very thin, discarding seeds. Beat eggs until light, add sugar gradually, then grated rind, water, butter, salt and lemon slices. Bake between two crusts. Put into hot oven (450 degrees). After 10 minutes reduce heat to moderate (350 degrees) and continue baking 30 minutes longer.

SALMON TURNOVERS

Chop fine one can salmon and one hard-boiled egg. Stir half a teaspoon moistened cornstarch in half a cup milk over slow fire. When thickened beat in salmon, one tablespoon butter and season. Cool. Make a rich pie crust, and cut the turnovers with a saucer upside down. Wet edges with cold water. Put a good tablespoon of salmon mixture on half of crust, fold over other half and press well together. Cut small slits on top, brush with milk and bake in quick oven.

No need to suffer with corns, or to run the risk of paring them. Remove them surely and painlessly with Holloway's Corn Remover.

Flames From the Sun

Sometimes Reach Height Of Half a Million Miles

Flames leap outward from the surface of the sun at the rate of 20,000 miles a minute and sometimes reach a height of half a million miles, says Dr. Ferdinand Ellerman, of Mount Wilson Observatory, California. When these "prominences" were first noted, during a complete eclipse, early astronomers were divided as to whether they belonged to the sun or the moon. In 1868, Sir J. N. Lockyer, the astronomer, found he could observe them by a spectroscopic method without waiting for an eclipse, and proved that they issued from the sun. It was while studying these tongues of flame that he became convinced of the existence of helium.

"May I call on you?"
"I'm sorry, but I'm married."

"Well, I'm married and just as sorry."

Minard's Liniment prevents Flu.

Selling Furniture

From Nelson's Ship

Three Pieces From Cabin To Be Disposed Of

Three pieces of furniture which Nelson used in his cabin in the Victory, and which today occupy their former position in the old battleship at Portsmouth, are to be sold by their owner.

The furniture consists of a mahogany dining table (which has folding leaves), sideboard, and wine cooler.

According to the description affixed in the cabin, the furniture was made by W. Wilkinson, of Ludgate-Hill, in 1800.

When Nelson's body was being brought to England, the Victory put back into Rosia Bay, Gibraltar, and the furniture was put ashore, where it is believed to have been secretly sold by one of Nelson's servants.

In 1862 it was bought by the grandfather of the present owner, who lent it to the Victory in October last.

BABY'S OWN TABLETS
WIN GREAT PRAISE

Many Mothers Always Keep Them In The House

Thousands of mothers state that they knew of no other medicine for little ones to equal Baby's Own Tablets—that they always keep the Tablets in the home as a preventive of childhood ailments, or if sickness does suddenly grip their little ones they feel safe with such a remedy at hand.

Concerning the use of the Tablets Mrs. Donat Plouffe, Tingwick, Que., writes:—"I have nothing but praise for Baby's Own Tablets. They are the only medicine I have ever given my two little ones and I am glad to state that the Tablets have always kept them in perfect health. I feel so safe with the Tablets that I always keep a box in the house."

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels, sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fever and make the cutting of teeth painless. The Tablets are absolutely safe, being guaranteed free from all injurious drugs. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Real Thrillers

The teacher had been talking about books.

"And what are your favorite books, Jackie?" she asked a young hopeful near the bottom of the class.

"Cookery books, Miss," was the astonishing reply.

"Cookery books" echoed the teacher.

"Because they are so full of string incidents!"

Little Helps For This Week

"And the Lord shall guide thee continually."—Isaiah lviii. 11.

Up, up the day is breaking.

Say to thy cares good-night;

Thy troubles from thee shaking.

Like dreams in day's fresh light.

He who for winds and clouds

Maketh a pathway free,

Through wastes or hostile crowds

Can make a way for thee.

—Paul Gerhardt.

Arduous is the conflict, but abundant the strength, hard the toil, but glorious the reward. Oh, forsake not me Thy child when walking through the great tumultuous crowds who know not Thy name! Wide is the sea through which I have to steer my course, and high its swelling waves; but grace is the breeze that fills the sails, my compass is faith, and my pilot is Christ.—Theobald.

The Customs Officer eyed the bottle suspiciously.

"It's only ammonia," stammered the passenger from the Continent.

"Oh, is it?" said the Customs Officer, taking a long sniff.

It was.

Employer—"Can you show a recommendation?"

Job Applicant—"Why, er-or, I was recommended to mercy by a jury once!"

A Scotchman may be tight but he'd give his right arm to a friend provided he had nothing in his hand at the time.

Record Of Juvenile Wonder

Boy Born In 1721 Possessed Most Unnatural Ability

Old records cite the case of one juvenile wonder named Christian Heinicke, born in 1721, at Dubeck, who at the age of ten months could speak and repeat every word said to him. At twelve months he knew the Pentateuch. In his second year he learned most of the Bible—Old and New Testaments. In his third year he talked history and geography. In his fourth year he mastered French. He was taken to Copenhagen before the King and proclaimed a wonder. He died June 7, 1725, from a weak constitution.

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

The average velocity of wind in Philadelphia is 10 miles per hour.

An odorless onion is cultivated by the Chinese.

OLD RELIABLE.

How far would you go to be sure of a better Oil-?

Knowing that a better oil means smoother performance, longer life, greater economy and bigger trade-in-value for your car, you'd probably go a long way to be sure of a better oil.

That's what Imperial Oil Limited did—went all the way to tropical South America for the crude out of which to refine Marvelube.

There's lots of crude oil available right at Canada's front door. If Canada's largest and most modern refineries had been able to evolve as good an oil as Marvelube from locally available crude they would have been glad to do so. Peruvian crude runs purer, carbon-free, fuller-bodied oil—an oil that meant better lubrication—so Peruvian crude was decided upon.

The decision set a new standard in motor oils. Aircraft operators, the most particular buyers of oil, are enthusiastic about Marvelube because it has given them a longer period of operation between engine overhauls, and a greater margin of safety.

You can enjoy the same benefits in your car, and there is a grade of Marvelube that is refined to meet the exact requirements of your car. Consult the Marvelube chart at good service stations and dealers everywhere.

Marvelube

EVERYWHERE IN CANADA

LOCAL ITEMS

Wesley Senger of Calgary was a Chinook visitor for a few days this week.

Miss Margaret Moore of Edmonton, is visiting for a time at the home of her uncle and aunt Mr. and Mrs. C. E. Neff.

A meeting of the citizens will be held in S. H. Smith's store on Friday evening, April 26th. The question which is to be decided is Chinook Sports day.

The Women's Institute will meet at the home of Mrs. Lloyd Robinson on Wednesday, May 1. Mrs. C. E. Thompson and Mrs. Robinson will be joint-hostesses. The Roll call will be answered by giving "Sayings of Aunt Het".

Mr. D. E. Holloway of the Land Settlement, Board placed 199 more trainees from the British Ministry of Labor. These were Charles Herb. Placed with N. E. Taggart of Excel and Ben Lewis, placed with E. W. R. Fyfe, of Benton.

Emerson Bowman, of Hawarden, Sask., is visiting his mother and brothers here.

Mrs. Auld and also Mrs. Crockett were Chinook callers on Wednesday afternoon.

Harry Nunmarker, Silver Lake, spent the week end visiting the Fisher Bros. here.

Mr. and Mrs. Klaas Hohenlohe have been visiting for the past five months at South Dakota and Nebraska and also a grandson, A. Mulpart, of Heele South Dakota, arrived here Wednesday afternoon by motor. They report having had a very good time and are looking well.

Mrs. J. M. Sinclair and two daughters who have been visiting at the home of her sister-in-law Mrs. R. Stewart for the past month, left for their home at Kamsack, Sask. on Tuesday.

A school meeting was held on Saturday, April 20th. Mr. C. W. Rideout was appointed school trustee for Bison district in place of Mr. J. L. Carter who resigned on account of ill health.

The first meeting of the Big Spring Prairie Rock Club was held at the home of Mrs. S. W. which seemed to have been similar to the last Thursday, April 19, for an ordinary sore throat, but a good number of ladies were present, and an enjoyable time was spent by all. The next meeting will be held, at the home of Mrs. A. Mower, on May the 9th. Morrison is attending.

Partial List of prizes of the above Society

SCHOOL WORK

CLASS 30	
1. Best Handwriting, 20 lines of poetry (Grades 1-3)	\$ 75 \$ 50
2. Best Handwriting, 20 lines of poetry (Grades 4, 5, 6 and 7)	1.00 .50
3. Best Handwriting, 20 lines of poetry (Grades 7 and 8)	1.00 .50
4. High School Student or any person, 20 lines of poetry	1.25 .75
5. Best Composition on a historical subject, by Public School student, from course of studies	1.00 .50
6. Best Composition on a historical subject, 2 pages, by High School student (Grades 1, 2, 3)	1.50 1.00
7. Best Collection of Art Work (Grades 4, 5, 6 and 7)	1.00 .50
8. Best Collection of Art Work (Grades 8 and 9)	1.50 1.00
9. Collection of Weeds, dried, pressed and named	1.50 1.00
10. Collection of Wild Flowers, dried, pressed and named	1.50 1.00
11. Best Bouquet of Wild Flowers	1.00 .50

FANCY WORK

All articles exhibited in this department must be the handwork of the exhibitor. No article which has been shown in previous years will be eligible for competition this year in the fancy work class.

CLASS 31	
1. Child's Frock, hand-made	\$2.00 \$1.00
2. Best Fancy Apron	1.50 .75
3. Knitted Socks	2.00 1.00
4. Knitted Mitts	1.50 .75
5. Best Darning in Men's Work Sock	.75 .50
6. Mat, hooked	3.00 1.50
7. Wool Yarn Mat, any kind	3.00 1.50
8. Embroidered Lillian	2.00 1.00
9. Towel with woven ends	2.00 1.00
10. Pillow Cases, fancy	2.00 1.00
11. Knitted Socks	2.00 1.00
12. Best Made Silk Brazier and Bloomer	2.00 1.00
13. Embroidered Library Scarf and Cushion	2.00 1.00
14. Child's Frock, machine made	2.00 1.00
15. Ladies' Apron, machine made	1.00 .50
16. Cut Work	2.00 1.00
17. Yarn Set	1.00 .50
18. Buffet Set	2.00 1.00
19. Embroidered Library Scarf and Cushion	2.00 1.00
20. Collection of Crochet Work	2.00 1.00
21. Collection of Knitted Work	2.00 1.00
22. Colored Lanchester Set, embroidered	3.00 1.50
23. Lanchester Set, any kind	3.00 1.50
24. Centre Piece (Quilt), white embroidered, not less than 27 inches	3.00 1.50
25. Centre Piece, colored, embroidered, not less than 27 inches	3.00 1.50
26. Best economical and practical article made from flour or cereal sacks	2.00 1.00
27. Patchwork Quilt, any kind	2.00 1.00
28. Fancy Bed Spread and Border	2.00 1.00
29. Fancy Cushion on Form	2.00 1.00
30. Best Baby Bonnet	2.00 1.00
31. Best Novelty	2.00 1.00
32. Best Six Buttonholes, made in six different materials	1.00 .50
33. Best Lady's House Dress	2.00 1.00
34. Best Suit Pyjamas, machine made	1.50 .75
35. Best Day Shift, machine made	1.50 .75
36. Best Purse or Bag, made from yarn	2.00 1.00
37. Best article hand painted or done with Paintex	2.50 1.25
38. Best article in applique	2.50 1.25
(Children, 12 and Under)	
39. Best Dressed Doll	1.00 .50
40. Embroidered Cushion Top	1.00 .50
41. Knitting in Wool	1.00 .50
42. Best Hummel article	2.00 1.00
43. Collection of Fancy Work	2.00 1.00
(Children, 10 and Under)	
44. Homestead Toy	1.00 .50
45. Buttonholes, six	1.00 .50
46. Embroidered Towels	1.00 .50
47. Knitted Socks	1.00 .50
48. Crocheted Lace	1.00 .50
49. Apron, hand-made	2.00 1.00
50. Collection of Fancy Work	2.00 1.00

SPECIAL PRIZES

Special Prizes for Pies, Cakes and Preserves Made From Home-Grown Fruit.

By L. Pringfield—\$5.00 for Best Pie made from Home-Grown raspberries. Exhibit to go to donor.

By C. W. Rideout—\$2.00 for first and \$1.00 for second for Best Map of Canada by Public School child.

By Agard Produce Co.—\$5.00 for first prize and \$2.50 for second prize for Best Collection of Fancy Work—not less than three pieces in any classes not included in the Prize List.

By T. E. Lox Co.—\$5.00 in Merchandise out of Catalogue for Best Collection of Six Vegetables. Not less than six specimens of each variety.

By W. A. Hurley—\$3.00 for Best Collection of Fruit, grown by exhibitor.

By W. A. Hurley—\$3.00 for Best Collection of Vegetables, not less than six varieties, grown and exhibited by a farmer.

By Royal Bank of Canada—Silver Medal for 1st and Bronze Medal for 2nd for the best milk fed calf shown by boy or girl.

By C. M. Reaz—\$10.00 first and \$5.00 second for the best colt, 1928, sired by "Donny," the club horse of the Colbourne Horse-Show Association.

By Women's Institute—\$3.00 for first and \$2.00 for second for Best Afternoon Dress, made by exhibitor.

By Six Spring Prairie Rock Club—\$2.00 for first and \$1.00 for second for Best Put Up School Lunch.

By Hurley's—\$5.00 sack of Royal Household Flour for Best Bread made from Royal Household Flour.

By Service Garage—\$5.00 in merchandise for Best Essay on "The Advantages of Ford Service Compared With Other Makes." The essay to be written by any school pupil, exhibit to become the property of the donor of the prize.

By Allen and Warren—\$10.00 for best cooking done by any girl under 16 years, given for best bread, pie or cake or collection of same.

All articles must be entered on the form provided for the purpose, with class and section filled in. Exhibitors will be expected to affix their own entry tags to the exhibited articles, and the Directors will be responsible for placing them in the hall. Extra entry forms may be obtained from the Secretary, Horace Dunster.

OLD AGE PENSION ACT IN OPERATION SOON

The Old Age Pension Act will probably come into operation in about a month, according to a statement made on Thursday by Premier Brownlee. The Act, it has been decided by the Executive Council, will be placed under the jurisdiction of the Workman's Compensation Board, and arrangements are being made for this board to administer the provisions of the new Act. Under the proposed plan it is necessary for each province sharing in the benefits of the Dominion legislation to submit its supplementary and contributory legislation to the Dominion through Hon. Peter Heenan, Minister of Labor, for ratification and to draw up a formal agreement of operation. As soon as this step has been taken it is expected the Alberta Act will come into effect. The payment of pensions will not become retroactive but will date from the time the Act is proclaimed.

LOCAL ITEMS

Wesley Seager of Calgary was a Chinook visitor for a few days this week.

Miss Margaret Moore of Edmonton, is visiting for a time at the home of her uncle and aunt Mr. and Mrs. C. E. Neff.

A meeting of the citizens will be held in S. H. Smith's store on Friday evening, April 26th. The question which is to be decided is Chinook Sports day.

The Women's Institute will meet at the home of Mrs. Lloyd Robinson on Wednesday, May 1. Mrs. C. E. Thompson and Mrs. Robinson will be joint-hostesses. The Roll call will be answered by giving "Sayings of Aunt Het".

Mr. D. E. Holloway of the Land Settlement, Board placed two new trainees from the British Ministry of Labor, these were Charles Herb. Placed with N. E. Taggart of Excel and Ben Lewis, placed with E. W. R. Fyfe, of Benton.

Emerson Bowman, of Hawarden, Sask, is visiting his mother and brothers here.

Mrs. Auld and also Mrs. Crockett were Chinook callers on Wednesday afternoon.

Harry Nunnaker, Silver Lake, spent the week end visiting the Fisher Bros. here.

Mr. and Mrs. Klaas Hohlen who have been visiting for the past five months at South Dakota and Nebraska and also a grandson, A. Mulpert, of Heele South Dakota, arrived here Wednesday afternoon by motor. They report having had a very good time and are looking well.

Mrs. J. M. Sinclair and two daughters who have been visiting at the home of her sister-in-law Mrs. R. Stewart for the past month, left for their home at Kamask, Sask. on Tuesday.

A school meeting was held on Saturday, April 20th. Mr. C. W. Rideout was appointed school trustee for Bison district in place of Mr. J. L. Carter who resigned on account of ill health.

The first meeting of the Big Spring Prairie Rock Club was held at the home of Mrs. S. W. Warren last Thursday, April 19, a good number of ladies were present, and an enjoyable time was spent by all. The next meeting will be held at the home of Mrs. A. Mower, on May the 9th.

There has been some cases of sore throats around the country which seemed to have been similar to an ordinary sore throat, but on Sunday Doraine Begon developed what the Doctor pronounced to be diphtheria. Mrs. Begon and one of the little boys are also down with it. Nurse J. Morrison is attending.

Chinook and District Agricultural Society

Partial List of prizes of the above Society

Extra entry forms may be obtained from the Secretary, Horace Danster.

OLD AGE PENSION ACT IN OPERATION SOON

The Old Age Pension Act will probably come into operation in about a month, according to a statement made on Thursday by Premier Brownlee. The Act, it has been decided by the Executive Council, will be placed under the jurisdiction of the Workman's Compensation Board, and arrangements are being made for this board to administer the provisions of the new Act. Under the proposed plan it is necessary for each province sharing in the benefits of the Dominion legislation to submit its supplementary and contributory legislation to the Dominion through Hon. Peter Heenan, Minister of Labor, for ratification and to draw up a formal agreement of operation. As soon as this step has been taken it is expected the Alberta Act will come into effect. The payment of pensions will not become retroactive but will date from the time the Act is proclaimed.

CLASSIFIED ADS.

BABY CHICKS—Canada's Best-Laid Lay, 100 per cent. Alvie, Leghorn, \$1.00, Barred Rocks and Anconas, \$1.00, Rhode Island Reds, Wyandottes \$2.00 each, 12 month poultry course free.
